About BLS & Our Services

BLS Software Private Limited delivers business technology solutions with a growing Microsoft cloud practice focused on infrastructure, productivity, continuity and managed services.

01

Azure Infrastructure Services

Secure, scalable Azure deployments.

02

Microsoft 365 Solutions

Licensing, migration and collaboration.

03

Backup & Disaster Recovery

Backup, replication and recovery planning.

04

Azure Managed Services

Monitoring, support and optimization.

05

Security & Identity

Secure access, protection and governance.

End-to-end support from planning and migration to security and ongoing management.

Azure Infrastructure Services

Modern infrastructure built for performance, security and growth.

Azure Virtual Machines

Scalable and secure virtual machines for any workload.

Application & Database Hosting

Host applications and databases with high performance and reliability.

Azure Networking & VPN

Secure connectivity with VNets, VPN gateways and firewalls.

Cloud Migration

Seamless migration to Azure with minimal disruption.

High Availability Architecture

Design resilient architectures for maximum uptime and business continuity.

Cost Optimization

Optimize resources and reduce costs without compromising performance.

Scalable

Easily scale resources as your business grows.

Secure

Enterprise-grade security and compliance built-in.

Business-ready

Built for agility, innovation and long-term success.

Microsoft 365 Solutions

Secure productivity and collaboration for the modern workplace.

01

Microsoft 365 Licensing

Right-fit Microsoft 365 plans for your organization with expert licensing guidance and support.

02

Email Migration to Exchange Online

Seamless and secure migration of emails, calendars and contacts with zero business disruption.

03

Microsoft Teams Collaboration

Empower teams with chat, meetings, calling and integrated apps to work smarter, together.

04

SharePoint & OneDrive

Secure file storage, sharing and team sites that enhance productivity and information management.

05

Entra ID & MFA

Strengthen identity security with Microsoft Entra ID, Conditional Access and Multi-Factor Authentication.

06

Intune & Defender Readiness

Secure and manage devices, apps and data with Intune and Microsoft Defender capabilities.

License. Migrate. Collaborate. Protect.

End-to-end Microsoft 365 solutions that drive productivity, security and business growth.

Backup & Disaster Recovery

Protect critical workloads and recover with confidence.

Azure Backup

Secure, automated backup for Azure workloads, applications, and data with granular recovery options.

Azure Site Recovery

Replicate and fail over critical workloads to Azure to minimize downtime during outages.

Microsoft 365 Backup

Protect Exchange Online, OneDrive, SharePoint, and Teams data against accidental deletion, ransomware, and human error.

Database Protection

Ensure business continuity for critical databases with consistent backups and point-in-time recovery.

Recovery Planning

Define RPOs and RTOs, document runbooks, and establish clear recovery procedures for business continuity.

DR Testing & Validation

Regularly test and validate recovery plans to ensure readiness and reduce risk when it matters most.

“Your backup is only valuable when it can be restored.”

Minimize downtime.

Protect your business.

Recover with confidence.

Azure Managed Services

Ongoing support to keep your cloud environment optimized and reliable.

Monitoring & Alerts

Track availability, health and critical events with proactive alerts.

Patch Management

Coordinate operating system updates and planned maintenance.

Backup Monitoring

Review backup health, failures and recovery readiness.

Performance Optimization

Tune compute, storage, databases and network performance.

Cost Management

Review consumption, budgets and cost-saving opportunities.

Technical Support

Assistance with incidents, changes and cloud service issues.

Monitor

Visibility across workloads and services.

Optimize

Improve performance and control cloud cost.

Support

Responsive assistance for day-to-day operations.

Security & Identity

Protect users, data and access across your cloud environment.

Microsoft Entra ID

Secure identities and streamline access with cloud-native identity and lifecycle management.

Multi-Factor Authentication

Add an extra layer of security to verify user identities and reduce sign-in risks.

Conditional Access

Apply adaptive policies based on user, device, location and risk to control access.

Role-Based Access Control

Grant least-privilege access with role-based permissions across your resources.

Microsoft Defender

Protect workloads, identities and data with advanced threat protection across the cloud.

Azure Key Vault & Encryption

Safeguard secrets and encrypt sensitive data with enterprise-grade key management.

Best Practice

Identify.

Protect.

Control.

Govern.

— Microsoft Indirect Reseller —

Why BLS Software

A trusted partner for your
Microsoft cloud journey.

Microsoft Indirect Reseller

Authorized partner delivering genuine Microsoft cloud solutions.

Azure & Microsoft 365 focus

Deep expertise in Azure infrastructure and Microsoft 365 productivity.

End-to-end project delivery

From assessment and design to deployment and managed services.

Backup & continuity planning

Reliable backup and disaster recovery solutions for business resilience.

Security-minded approach

Best practices, governance and compliance built into every solution.

Responsive support

Proactive monitoring and expert support when you need it most.

From cloud adoption and migration to managed operations, BLS helps businesses build reliable, secure and scalable Microsoft environments.

Let's build your cloud future.
